## Description

1. With the ScreenShots, it would be nice if you could also explain different functionalities for example; the specific things we are now able to do in every tab we have on the parentboard 😊
2. You can upload the final document.

I find this tutorial really helpful for designing QT buttons. It explains how to create custom QT widgets using the example of PushButtons.

<https://youtube.com/playlist?list=PLw1hBEGKfRbmG382qraR41aavCOeiciWN&si=lbZImtpcaUivc1y7>

Also, have a look at this playlist. It's not big, just 5 videos, and it explains how to design QToolBar, QScrollBar, QMenu, and how to add a title to a floating menu. If I'm not mistaken, it is written for the most up-to-date QT version

### Comments

Comment by [Muazzam Bin Aqeel](#) [ 06/Nov/23 ]

-We have planned to use SQL as the main language for the database.

-Application that we are using: MyWorkBench

-The database team has already created the tables and is currently working on the relationships between those tables
